## Lip Plumper

### PAMPER YOUR LIPS AND MAKE YOUR SMILE SIZZLE AGAIN!

A sure sign that youth is slipping away is when once luscious and dewy lips start to lose skin elasticity resulting in fine lines and thin lips.

There is more you can do for the look of your lips. In the same amount of time it takes to put on lipstick, you can start to recapture the look of lush and lovely lips without having painful injections or skin-irritating inflammation.

SISEL Lip Plumper formula contains peptide ingredients. Peptides are chains of amino acids that act as messengers throughout the body. Peptides play a key role in turning on collagen production.

Collagen production naturally declines as we age, which can result in lips that look older.

**SISEL Lip Plumper** feels like a spa treatment on your lips. Your lips are abundantly conditioned with rich emollients. A natural mint flavor adds to the pleasure of wearing Lip Plumper.

You don't just want fuller lips, you want them to be velvety and soft!

SISEL Lip Plumper contains essential fatty acids, phospholipids and vitamins for conditioning, hydrating and revitalizing your lips.
