SkinDu

KEEPS SKIN MOISTURIZED AND REFRESHED

As we age, many of the skin's naturally youth-defending properties gradually disappear. Components in our skin, such as hyaluronic acid and NaPCA, attract humidity from the surrounding air and also help the skin form collagen and elastin. These properties are found plentiful in youthful skin, but dwindle as we get older. Unfortunately, without intervention, our aging skin will develop wrinkles and fine lines, replacing our youthful look. Our advanced team of scientists understand the skin's chemistry and have found the perfect remedy—SkinDu. These expert scientists conducted a clinical trial under the guidance of senior researcher Tom Mower.

The experiment included people of different ethnicities and skin types. Both genders participated. At the beginning of the test, the moisture content of the face was measured, and for eight weeks, SkinDu was used twice daily. At the end of the eight weeks, the moisture content of the face had increased by an amazing 97%, and the appearance of unsightly wrinkles and fine lines were diminished!

Creatively packaged as a spray, SkinDu is created for the express purpose of providing moisture to the skin when needed no matter your location. SISEL's spray-pump bottle is convenient and allows you to take SkinDu with you where ever you go. Just remove the cap and pump to restore youth-protecting properties to your skin even over your makeup. It is recommend that after using Timeless Minerals, you should lightly spray over your face to "set" your makeup, prolonging the wear of your Timeless Minerals cosmetics.

With an ideal blend of moisturizing and regenerative ingredients, SkinDu offers you a convenient way to protect your skin from the environment, no matter the season. With a dewy-fresh spritz, you can refresh and hydrate your skin. Look your best throughout the day. Spray your way to a younger-looking you!

**ULTRA MOISTURIZING,
YOUTH-ENHANCING AGENTS
WILL KEEP YOUR FACE
LOOKING REFRESHED AND
BEAUTIFUL**
